

Picosure Laser:

- Face maybe hot during and immediately after the treatment. Do not apply and topical treatments the same day as the treatment other than what is applied in the office. The next day, you can resume your normal skin care and/or makeup
- Pigment may get darker at first then slowly flake off
- Approximately 1 day downtime
- Mild swelling or small bump formation (due to irritated hair follicles). If small bumps form, hydrocortisone 1% cream can be used twice per day x 2 days as treatment.
- Mild redness/pink skin
- Very little to no peeling of the skin
